Sorry Bryan, but your assumptions are correct. Good luck with it. Jim

Jim,

I am putting the finishing touches on my research into the fraudulent autopsy photographs submitted by the DOD to Federal Court and the Congress in the Colonel James Sabow homicide. Is your position still you will not accept for ISJ anything to do with the Sabow case?

Bryan

Subject: Investigative Sciences Journal

Hello everyone – I hope you all had a great holiday and are looking forward to a new year and our meeting in Seattle.

I just published an article on Staged Crimes Scenes in my journal at
www.investigativesciencesjournal.org for Vol 6, No 1, January 2014.

If you get rejected by the Journal of Forensic Sciences, or any other journal for that matter, consider The Investigative Sciences Journal for your next project. With that I am not promising I will publish it (just rejected 2) as I do have all manuscripts peer reviewed, but your chances are greater.

Hope to hear from you. Thanks, Jim Adcock
